ALMA MATER DANCE ATTACK MADE ON EARLY NEXT MONTH DR. MAUD ABBOTT

Tickets Will Shortly Be On Sale.

Struck On Head On Lorne Ave. Thursday Evening.

A fitting wind-up for the more formal affairs of the season will be the Union Dance which has been scheduled for March the 10th. The Union Formal and the Junior Prom, are certainly epoch-making events in their way but attached to this dance is a unique dignity and prestige that classes it above all others.

Alma Mater—the very name, savouring of graduations and stately college buildings, suggests a concourse of students and professors, gathered together in one of the most pleasing expressions of college life. The informals are becoming very popular at McGill and perhaps never before were so many dances held at this College than during the present season. In spite of this fact, the Alma Mater Dance, scheduled for minds of the students and judging from the interest shown, it will not be neglected this year. Then, the Informal scheduled for last night did not materialize and disappointed ticket purchasers will again be looking around for the fair one to take to the Dance.

Arrangements are being carried out which will make this a function to linger in the memory of those fortunate enough to attend. The Alma Mater is not an ordinary dance and anyone will do well to be on hand early at the sale of tickets. Further information will appear in the "Daily."

WHAT SHE SINGS AND WHY.

The Lament of a Co-ed.

About the way I do my hair,
I want a man who doesn't care,
I'll take a man who can't half see,
If only he acts like he's wild over me.

I want a man with lots of jack,
I don't care if his feet don't track,
I want a man, that's wild and brave,
Mean as a panther fresh from a cave,
A man who'll tame me and make me behave.

I came to school to get a man,
I'll get him too, if I possibly can.

Another member of the Faculty of Medicine has been the subject of an assault. This time it was Doctor Maud Abbott, the curator of the Medical Museum, who suffered. While on her way to the Medical building Thursday evening, she was struck a blow on the head from behind and rendered unconscious.

It occurred at the corner of Prince Arthur St. and Lorne Ave. at about 8.45 p.m. Her assailant, whose motive is thought to have been robbery, were three young men, about eighteen years of age. They were forced to flee when a lady passing by saw the attack and by her screams brought other pedestrians to the spot. Dr. Abbott's handbag was apparently the object of the attack. She stated that apart from her shock, she was unhurt by the blow. A special force of police have been detailed to keep a close watch on the place.

I don't like books, they don't interest me,
I'm not a coquette, no sirree,
Grades don't count for much with me,
Styles I follow, like a vine 'round a tree.

I use cosmetics, powder and paint,
Not too heavy, yet not a bit faint,
My idea is to tone up Nature,
So the men will gasp "What a lovely creature."

I offer my ankles to the sight of men,
So one of the crew will be attracted by them,
Fur-trimmed galoshes I sometimes wear,
Strange means I use to dress my hair.

All these devices, and many more,
I could relate 'till my tongue grew sore.

The main idea is to marry young,
I want a man, and I bet I'll get one.

P.S.—She has a good chance, with present ratio of five to one.
IQUE ANL MIQUE.

FAVORABLE REPORTS OF GRADS. FUND

Interview With Mr. J. W. Jeakins

GOOD PROGRESS

Three Grads. To Be On Board Of Governors.

In an interview granted to the "Daily" yesterday by Mr. J. W. Jeakins, Secretary of the Graduate Society, Mr. Jeakins was most optimistic about the future of the Society and of McGill. "The Graduate Society," he said, "is now a vital, living thing around the University, and has at the present a membership of two thousand or more." With a little more increase in enrollment the Graduate Society will soon be as large as McGill, and the Society may well be proud of its present success. The importance of the Society is recognized both around McGill and elsewhere.

Mr. Jeakins drew attention to the fact that at the present time two members of the Grads are occupying places on the Board of Governors of the Corporation of McGill University. This is about one phase of the mutual consideration shown everywhere to the aims of the Society. And next fall it will have, not two, but three members on the Board of Governors. This fact alone speaks for itself. The two members at present on the Board are:

Eugene Lafleur, K.C., Arts '77, Law '80.

Graham Drinkwater, Sci. '97.

In reply to a query regarding the Grads' Endowment Fund, which had its inception during the Reunion last Fall, Mr. Jeakins said that it was coming along well. To bring this fund into existence it was necessary to amend the constitution of the Society. This was voted upon by letter-ballot, and the amendment was carried almost unanimously, there being only two dissenting votes. At present committees are being formed, and trustees for the fund are being looked out for. The idea of the fund is to promote a steady stream of contributions from graduates instead of intensive calls upon their pockets, such as the campaign some time ago. It will among other things induce graduates to make out insurance in favour of the fund, and also to make bequests to McGill through the fund. Another scheme is to ask certain classes to make a fixed payment when they have been out of McGill five years, and other payments at stated periods after that.

"Homecomings", or small-scale reunions of the type that were held last year, are also in the stage of final development. It has not yet been decided whether to hold these at intervals of four, five, or six years, but the matter is under close consideration. This will help the graduates to keep in touch with their old University and with the spirit that animates it.

ADDRESS AT MED. BUILDING TONIGHT

Professor Ewing on Pathological Anatomy.

"The importance of Pathological Anatomy" is the subject of an address to be delivered this evening to graduate and undergraduates in Medicine. Professor Ewing, head of the Department of Pathology at Cornell University is undoubtedly an authority on his chosen field of work and the lecture will be of great interest to every Medical student. The reputation of the McGill Medical Faculty has made it possible to invite visitors of world-wide reputation and it is an invaluable boon to the students to have the privilege of hearing speakers from outside their own college, who bring them ideas and views which might not be considered otherwise. Those who attend the lecture at the Medical building tonight may come prepared to hear a great deal of sound information. The lecture will be at nine o'clock.

"Sages tell us that the best way to get the most out of life is to fall in love with a great problem or a beautiful woman."

"Why not choose the latter and get both?"

I stood on the banks of a brook,
My senses were almost reeling,
Every once in a while I ventured a look,
For the village bells were peeling.

WHAT'S ON TO-DAY

10.30—Carnival on Campus.
12 noon—Medical Dance Committee Meeting—New Med. Bldg.
1.30 P. M.—Science Hockey—Windsor Station.
3.00 P. M.—Ski jumping.
4.00 P. M.—Intermediate A Basketball.
9.00 P. M.—Prof. Ewing's address to Medical Students.

COMING

Feb. 26:
11 P.M.—Dr. Robert at church service in Union.
Feb. 28:
Students' Society at Union.
March 1:
St. Whiffletree Show.
March 1:
Medical Dance.
March 4:
R. V. C. The Dansant.
March 9:
Newfoundland Club Dinner.
March 10:
Alma Mater Dance.

CARNIVAL IS WELL STAGED THIS YEAR

Green and White Have 14 Points

JUMPING 3 P.M.

Dashes On Campus At 10.30 Friendly Rivalry Keen.

The students from Hanover set a fast pace on the opening of McGill's third annual carnival by capturing a lead with a total of 14 points. The Canadians are second with 8 and Middlebury have 5 points.

The weather was cold yesterday but the conditions of the snow could have been a good bit worse around the Park Side where the events started from. The first competition was the ski proficiency. Good form was shown by the several colleges represented, especially by Johnny Carlton of Dartmouth who carried off the honours.

A long queue of runners lined up for the eight mile race which was one of the closest held in Montreal for some time. The men were started at half minute intervals from the entrance of the Montreal Ski Club's clubhouse, with a cutting wind blowing from the West. When the last man had returned from the icy course it was announced that Ralph Whittall of Sci. '24 had made best time having covered the distance in 7 minutes 30 seconds. R. Bowler of Dartmouth was but one minute behind the winner while Howard Elliot of Arts '22 was a close third. The route of this ski run was over well selected parts of the mountain but owing to the crust produced by the recent storm very entrant was called upon to use his best judgment and every ounce of pep.

The third and last part of Friday's schedule was the two mile snowshoe run. This in some respects was the most exciting to watch than any other. About twenty snowshoers were ranged across the road, which had the effect of causing a spirited start to get the best part of the track. Cole of Middlebury, the winner of intercollegiate game, took the lead and maintained it throughout. Anderson of McGill kept hot on his heels for the first half mile but from that point on the order of runners shifted continually. This lasted up till the last quarter of a mile when the first two men drew away. The finish for the third place was very close and it was only by a thin margin that Anderson came in fourth. He put up a fine exhibition of sportsmanship having spent part of the present week in bed suffering from a skiing accident, but considered it his part to take his place yesterday.

The results of yesterday were:—
Ski Proficiency: Carlton, Dartmouth; Stewart, Dartmouth; Glen and Gravel McGill Ski Cross-Country.
Whittall, McGill; Bowler, Dart. Elliot, McGill. Time 47 minutes 30 seconds.
Snowshoe Cross Country: Cole Middlebury.

(Continued on Page 4.)

THE LAST DAY

To-day, Saturday February 25th is the last for receiving nominations for the offices to be filled on March 8th. All nominations not already in the hands of the Secretary must be delivered by six o'clock.

LECTURE ON THE WONDERS OF THE ATOM

Dr. Eve Addresses Physical Society.

RADIOACTIVITY.

New Ideas Of Atomic Structure Summarised.

That this solid globe is nothing more nor less than a whirling complexity of electrical energy, positive in equilibrium with negative, locked within the elemental atom, was the statement made by Dr. A. S. Eve in an address delivered before the Physical Society last evening.

The present conception of the complex structure of the atom, said the lecturer is of quite recent origin. He could remember the time when the atom was considered to be an opaque, hard, round body, somewhat analogous to a machine-made billiard ball. The discovery of the undreamed of property of radioactivity had, however, completely revolutionised the atomic theory and opened a vast new field of research. The challenge had been accepted by science, and a new theory had been formulated which not only gave an explanation of the phenomena of radioactivity, but also of those connected with electrification and valence, and presented a picture of the interior structure of the hitherto supposedly indivisible atom.

The atom as it is now known consists of three regions: a nucleus which was shown by Rutherford to consist of a positive charge of electricity; a region of inner rings from which originate the emanations of energy connected with X-rays; and lastly a region of outer rings, which alone is concerned in spectroscopic and chemical phenomena and with valency. Around the positive nucleus revolves a certain number of negatively charged electrons which neutralise the positive nucleus. The hydrogen atom contains only one electron. The helium atom has for its nucleus a charge equal to four hydrogen nuclei which is equivalent to the alpha particles given off by the radioactive elements. This is held in equilibrium by two negative electrons, and the atomic number of helium is 2. The atomic numbers of the elements are whole numbers which are inversely proportional to the square root of their X-ray spectra. When the atoms are arranged in the order of their atomic numbers the elements of similar properties appear in octaves and an improved periodic table is formed. The atomic number is equal to the number of units of positive electricity in the nucleus of the atom, and hence to the number of electrons. The atoms of carbon consists of a nucleus of three alpha particles each of which is equal to four hydrogen nuclei or to four electrons. The number of electrons in the carbon atom is therefore twelve, and the atomic number is 12.

(Continued on Page 2.)

MEDICAL PROM. TO SET NEW STANDARD

Many Surprises Planned For Event.

There is every indication that the Medical Dance this year will equal and perhaps surpass the social functions held in the past by the budding doctors.

While a very high standard has been set in previous years the committee in charge felt justified in going still farther in attempting to make the faculty dance the most brilliant social event of the whole college year. The number of couples that can be accommodated this year is the largest in the history of this function, and almost every inch of space in the building that can be utilized will be made a part of the festive scene.

The latest novelties and stunts will be introduced into the dances and decorations, but the committee prefers to keep secret the detailed plans, that the surprise may enhance the pleasure of the occasion.

Special talent is being directed toward the lighting of the museum, and the beautiful colors in the great dome will be utilized to spread a dim colored light through the three floors of the building.

New shades for all lights have been designed, and will be made by the ladies committee.

A programme giving the order of dances will be published in an early issue of the Daily.

All undergrad tickets should be secured this morning from class representatives.

MONTREAL, SATURDAY, FEBRUARY 25, 1922.

INTERNATIONAL SPORT.

The international Ski and Snowshoe carnival now being held forms another link in the series of events which have been held of late between American and Canadian universities. As a result of yesterday, Dartmouth is well in the lead, with McGill second, and the former college has an excellent chance to duplicate her victory of two weeks ago. Middlebury took third place, while Williams scored nil.

The past year has witnessed an increasing number of international meets, and it is sincerely hoped that more will be arranged in the near future. McGill has competed with her sister universities across the line in almost every branch of sport. The relations between the two Anglo-Saxon peoples, the United States and The British Empire are closer to-day than ever before in history, and the bonds of kinship can never be broken. The highly successful Washington disarmament conference was a great factor in bringing the two peoples nearer together. Henceforth they will be joint guardians of the seas, and further developments will doubtless make relations even better.

Friendly competition in wholesome athletics is as vital as the decisions of statesmen. Diplomatic relations and sport are not so far apart, and both serve a great purpose.

McGill heartily welcomes the representatives of her sister universities, and after the day is over will bid them a sorrowful farewell, with the hope of seeing them again in the future.

"FED UP."

This is the season of the year when many students declare they are "fed up." This week-end's fixtures bring university athletic activities almost to an end. With the cessation of inter-class sports, first and second year students have to take gymnastics in Molson Hall, much to their sorrow. Clubs and dances are on the wane, and not so well attended. Work is being augmented in all faculties, and the weary student wonders how he or she will ever be able to accomplish it all. But the sessional examinations are only seven weeks away. Many seem to forget them until about seven days remain, and feverish nights of toil, not forgetting the proverbial wet towel, often prove unsuccessful. The unfortunate student studies all summer, and even then sometimes fails to pass the supplemental examinations.

The main purpose of a university career is to fit us with an education which will serve to make us successful men and women. Athletics and social activities, while essential, must give place to our studies. The only way we can possibly get through our work, is to start right now. Steady work would be the solution of most of our troubles. Then after the results have been published, we can sit back, and smile at our success. A few months vacation, with no anxieties for the future, will allow us to pursue whatever course we wish—if we only work.

A UNIVERSITY SERVICE.

The second university church service will be held to-morrow morning in the Union, and the Rev. Dr. Richard Roberts will be the speaker. The Rev. Principal Rexford will preside, and Sir Arthur Currie will read the lesson. Dr. Roberts recently assumed the pastorate of the American Presbyterian Church, and is well known in Great Britain and America as a powerful preacher and a theological writer of repute. He has long been connected with student Christian movements on both sides of the Atlantic. Interviewed on his arrival here, Dr. Roberts commented on a significant Christian revival in the British universities. A number of McGill students have already heard him, and they were greatly impressed by his message.

Religion is much needed in the world to-day. Unrest is universal, with materialism and doubt ever increasing. The religious revival hoped for as a result of the Great War has not materialised. Our leaders time and again have declared that the only hope of the world lies in a spiritual awakening. Our own principal has often voiced the same opinion.

McGill men and women are well known in the churches of Montreal. At almost every service one can spy at least a few. The service to-morrow is for everyone connected with the university, professors and students alike. The service already held was successful, but a better attendance is hoped for this time. Let us all make a special effort to hear Dr. Roberts to-morrow.

ODD TALLY WAYS.

To keep score and to keep tally are common enough phrases; but few of the ardent boys and girls who keep the score of an exciting game of baseball, and afterward compare score cards to see if their records tally, have any idea whence these two words are derived.

Originally they were exact synonyms; a score being a scar or notch upon a tally-stick, while tally comes directly from the French tailleur, to cut, whittle or notch. The use of tally-sticks, one would think, must belong either to remote antiquity or to regions beyond civilization and its accompanying school arithmetic; yet such is by no means the case. That it still survives in rural France is attested by an American educator who has traveled much in that country.

ed peasants before the fireplace of a country inn, the landlady of which also conducted the village bakery, he noticed hanging from the mantel two great bundles of sticks. Examining them, he found that each rod was about eighteen inches long and was split up more than three-quarters of its length, the split portion being covered with notches, while upon the handle was inscribed a name.

The mistress of the inn observed him puzzling over these mysterious objects and good naturedly explained that they were tallies and that all the bakery accounts were kept in that manner.

Every customer was provided with a hazel stick split through the greater part of its length and with his name on the handle. The split off piece of wood was retained by the customer; the principal stick by the baker. When the customer desired a loaf or two he came to the

HONOUR MEMORY OF DR. PATERSON

Will Establish Memorial Trust Fund at Saranac Lake.

The following letter is being sent to all former patients of late Dr. Robert C. Paterson, a distinguished graduate and gold medalist of McGill who met his death at the hands of an insane patient last December at Saranac Lake.

"Among a few of Dr. Robert C. Paterson's patients in Saranac Lake, the affection and gratitude which they felt for him have crystallized into a plan for a memorial trust fund to be administered by the Saranac Lake Society for the Control of Tuberculosis. The fund will be known as the Robert C. Paterson Memorial Fund and the income will be used to aid deserving patients in temporary financial straits.

Any one who has any acquaintance with conditions in Saranac Lake knows how frequent such cases are. Dr. Paterson, like all of the doctors here, took care of many such, receiving little or no remuneration. It is felt that he would be especially pleased at such a form of memorial, for it will do good in a field in which he himself did a great deal. This is an opportunity to repay, in a small measure, the debt of gratitude which many feel they owe Dr. Paterson.

A committee has been formed of which Dr. E. R. Baldwin, Dr. Lawson Brown, Dr. Hugh M. Kinghorn, Dr. J. A. Munroe, and Dr. W. B. Soper president of the Tuberculosis Society have consented to serve as advisory members.

It is hoped to have as large a number of subscriptions as possible. It is also sincerely hoped that no one will hesitate to give because his or her subscription must necessarily be a small one. An amount will be very welcome.

Cheques may be made payable to the Saranac Lake Society and addressed to A. P. Caywood, Exec-Sec'y, Saranac Lake Society for the control of tuberculosis, Inc., Saranac Lake N.Y.

Sincerely yours,

John B. Black.

Frederick H. Wooley.

FELLOWSHIPS FOR SCIENCE STUDENT.

The Registrar's Office has just been informed that McGill student are eligible for the Beit Fellowships for Scientific Research. These Fellowships, three in number, are worth £175, and are tenable for one year at the Imperial School of Science and Technology, London, England. They have been founded by Otto Beit for the advancement of Scientific Research. Applicants must be under 25 years of age, and application must be sent in before the 19th April 1922. The elections will take place on July 15th 1922. Those interested may receive further information at the office of the Registrar.

shop with his stick, it was placed in connection with the piece from which it had been originally taken and then with a knife a notch was cut at the point of contact at one side, so as to mark both pieces of wood. When one side was thus scored full the score was carried down the other junction.

As soon as the account was paid the tally-stick was thrust into the fire.

The visitor carried away a tally, as a curiosity, but on showing it in England he was surprised to learn that a farmer's wife in that part of the country in which he was staying kept her account for butter and milk on a notched stick.

English Hall Marked Flatware

When silver of such excellent quality and artistic design is offered at the low prices now prevailing at Mappin & Webb's, there is wisdom and economy in immediate purchase.

Among the many beautiful designs will be found the Kings, Adams and Pembrey; all these patterns are carried in open stock, and can be added to from time to time.

Mappin & Webb

353 St. Catherine St. West, Montreal.

PEPYS AT McGILL

Friday, Feb. 24th. There was this day in and about the halls of the Union a fair scattering of ski-men, that be come here to compete with our men out of the assemblage of rebel colonies to the south of these Canadas and they to my mind as fair and upstanding a set of fellows as ever I did see hereabouts, and except onlie for their native yarb I did perceive no sort of wrack or wildnesse in their demeanour; these cloathes do consist of high boots brought almost to the knee, and with some of them round hats of a sort of felt-cloth with the brims very hedged about and round in like fashion, and this all say to be the very excellence of fashion in their own land. In a great and sudden manner to read in the news-sheet this right that our Governours do intend to place still further curtailment upon the sale of all liquors, and, Lord, it is no hard enough, in sooth, to procure it already, but that they should seek to place still further embargo upon one of man's chiefest joys on this Worlde. So to gaze fondly upon my little stock of ale, and hence very wistful to bed.

LECTURE ON THE WONDEVS OF THE ATOM

(Continued from Page 1.)

It is believed now that no atom is completely stable. Electrons can enter or leave the atoms, though without affecting the atomic weights of the bodies. And radioactivity is not confined to the elements of the radium family. It has been discovered in 42 elements and there are expected to possess it to a less degree. Professor Eve illustrated the disintegration of the Uranium group by means of a graphic wall chart. Uranium as an atomic weight of 238.2. It loses an Alpha particle becoming Uranium X, which as should be expected has an atomic weight of four less than that of the original Uranium. This may lose a beta particle and then becomes Uranium X'. Without losing in atomic weight. Such instances as these two forms of Uranium which have the same atomic weight are known as isotopes. This radioactive disintegration continues through uranium, radium, actinium, other forms of actinium, and finally concludes in lead. For every alpha particle lost the atomic weight is decreased by four, but as a beta particle given off there is no change in atomic weight, an isotrope form of the same substance being produced. Radium exists with several atomic weights, and in several isotrope forms.

During his address, Dr. Eve, showed several slides giving diagrams and illustrations of spectra and exhibited diagrams of the structure of several kinds of atoms.

Other experiments that prove these conception of atomic structure were made by Zeeman in connection with the behaviour of light in a magnetic field and by Stark who observed the polarisation of light when in an electric field.

On concluding his address, Dr. Eve stated that he had endeavoured to give a brief account of recent progress in this field. Much had been accomplished, but the subject matter which he had discussed was of a nature at present, so little understood and yet of so far reaching consequences, that there was in it enough to furnish scientists with a thousand years of enquiry and experiment. On the conclusion of his address a hearty vote of thanks was tendered to Professor Eve, and owing to the lateness of the hour the meeting adjourned without further discussion.

Robert V. Fortune

IS THE WINNER OF THE \$5.00 Prize

offered by the Question Editor of the Daily.

This reply was received Monday (P.M.) at McGill Union, Feb. 20th. There were four other replies, but Mr. Fortune's was the first received.

The Question Editor received hundreds of replies.

Here are some of them:

Where do you buy your clothes?
Where will I buy my spring hat?
Where did the money come from?
Where to dine at McGill Union?
Where are Daily Ads for Women?
Where can the Daily Get Money?
Where is it best to Advertise?
Where should you look for Ads?
Where do you do your shopping?
Where is the McGill News Read?
Where is the spirit of McGill?
Where should I buy my clothes?
Where should I spend my money?
Where do we see it advertised?
Where do you do your shopping?
Where do you buy your cravats?
Where should we look for Ads?
Where did the Daily get money?

Where are the Ads coming from?
Where could girls help Daily?
Where will we buy our clothes?
Where do you get best service?
Where does this Adv. come from?
Where shall we get some money?
Where shall we get more money?
Where do well dressed men buy?
Where did the Daily get its Cash?
Where should a McGill Man buy?
Where do we owe our patronage?
Where will the five come from?
Where did you buy your things?
Where does the Daily get Cash?
Where do you obtain the money?
Where has this Ad vanished to?
Where do you spend your money?
and many others.

Most of these answers were duplicated many times. Dozens gave the first answer in the above list. It was by far the most popular. One thing we noticed which appealed strongly to us was the fact that practically every student, both boys and girls, who replied indicated by his answer that he realized the importance of reading and responding to the advertising that appears in the Daily. We have proven to our satisfaction that the students of McGill realize their responsibility in this respect.

THE THING WE MUST IMPRESS UPON THE STUDENTS IS THAT THEY MUST TALK MCGILL DAILY TO EVERY FIRM WITH WHICH THEY SPEND THEIR MONEY. WE CANNOT CONTINUE THE DAILY WITHOUT THIS CO-OPERATION. IT COSTS THOUSANDS OF DOLLARS EACH YEAR TO GIVE MCGILL THIS PAPER AND THIS EXPENSE MUST BE MET WITH ADVERTISING REVENUE. WE CANNOT SECURE THIS REVENUE UNLESS EVERY STUDENT MAKES IT KNOWN THAT HE IS A READER OF MCGILL DAILY EVERY TIME AND EVERY WHERE HE SPENDS A CENT OF MONEY. THE CORRECT ANSWER TO THIS "WHERE" QUESTION IS THEREFORE MOST IMPORTANT TO THE PUBLISHERS OF THE DAILY AND TO YOU AS A STUDENT IF YOU WANT YOUR DAILY.

THE CORRECT ANSWER GIVEN BY MR. FORTUNE THE WINNER IS THE LAST ANSWER GIVEN ABOVE AND THE QUESTION THAT HEADS THE COUPON BELOW, VIZ., "WHERE DO YOU SPEND YOUR MONEY" and that is EXACTLY WHAT WE WANT TO KNOW AND THAT IS WHY WE OFFERED THIS PRIZE.

Every Student Who Wants to Assist The Daily

will send in the following coupon properly filled out. No Names will be used or published but it will give us a line on where the Students of McGill spend their money and therefore where we can reasonable expect to secure Advertising patronage.

WILL YOU DO THIS FOR THE DAILY?

USE THIS COUPON.

Where Do You Spend Your Money?

We want to know where you made your expenditure for the past week. Please do not neglect any. Tell what picture shows you attended, where you made every purchase, whether for candy, cigarettes, clothing, meals or whatever else you might have spent as much as five cents for. This will be of the greatest assistance in maintaining the Daily. Just clip this coupon, fill it out and leave it at the UNION addressed Business Department of McGill Daily.

I made the following purchases at the following stores last week.

PRESBYTERIANS GO DOWN TO DEFEAT AT KINGSTON

McGill Showed Superior Combination and Shooting—Queen's Team Work Was Ineffective—Anderson and Flanagan Star For Red and White—McKelvey Outstanding on Queen's Line-up—Final Score Was 9 to 5—Last Game of Season.

(Special to McGill Daily.)

Before a good crowd here last night, McGill won the last Intercollegiate hockey fixture for the season, defeating the Presbyterian sextet by the decisive score nine to five. The red and white players were superior to the locals, both in combination and shooting and outplayed the Queens team in the first and last periods. In the second period, however, the local collegians staged a strong comeback, scoring three goals and were within one goal of a tie. The play in this period was rough, the checking being hard and several men were given an enforced period of rest. In the third period, however, the McGill men got working smoothly again and clinched the game by nothing up four more tallies to their credit.

All the McGill men were working at top speed throughout the three periods, Flanagan and Anderson starring for the red and white, the former having four goals to his credit, while Boo managed to sag the nets on three occasions. "Snowflake" Lynch was back on the old job and he and Dempsey accounted for the remaining two points.

Stenson in goals was as usual remarkably cool and reliable and on many occasions saved when sure goals were looked for by the local supporters. McGerrigle played a strong and consistent defence game, staging many of his well known spectacular rushes.

Red McKelvey was probably the most consistent and effective of the Queens men, proving a dangerous man on all occasions and giving a clever exhibition of good hockey. His team mate Gibson was the other strong member of the team, accounting for two of the five goals scored by the local puck chasers.

The result of this game gives McGill the second place in the league, with the Presbyterians dropping to the cellar. Toronto Varsity had already made sure of the first place, by defeating both of the other colleges.

The game by periods was as follows.

First Period.
Queens opened with a rush and set a hard and fast pace. McGill however was playing fine combination, every player on the red and white squad giving a fine exhibition of stick handling. Dineen and Anderson working good combination, Boo scored and soon after fooled the local goalie again by a beautiful side shot. McGerrigle rushed the Queens goal but failed to score and the play changed to the McGill end of the rink. Flanagan secured the puck back of the Presbyterian goal and passed to Lynch, who sagged the nets for another tally. Soon after Flin brought the puck through the defence by a clever bit of stick handling, beating the goalie by a fast shot. Flanagan was playing brilliant hockey chalking up the fifth point for McGill on a pass from Dineen.

Boo got the puck but failed to score and McKelvey made a dangerous rush on the McGill goal. Gibson finished the scoring for the period by following Stenson for the first time in the game.

Score at the end of the period: McGill 5; Queens 1.

Second Period.

Period opened with some wonderful saves by Stenson. Campbell, of Queens, had a clear shot for goal but was unable to fool the captain of the red and white sextette. Boucher penalized for tripping. Play was getting rough. Dempsey sent to the bench but locals could not score. Nelson shot from outer defence and managed to fool Stenson. Campbell soon after notched another for the local squad and then mixed things up a bit with Lynch, both players being penalized. Gibson slipped through and sagged the nets again for Queens. Queens working hard to tie the score but in spite of great effort were unable to do so.

Score at end of period: McGill 5; Queens 4.

Third Period.

Flanagan playing fast game and continually threatening the Queens goal. Unable to score however. McKelvey brought the local fans to their feet by tying the score but this was the last time the Presbyterians got passed Stenson. Dempsey put McGill on top once more by scoring on a good pass from Anderson. Dempsey playing a strong defence game and broke up a strong rush by McKelvey. Dineen put off for tripping but Flin scored on pass from Dempsey, bringing the score up to 7 to 5 for the McGill team.

Boo working hard and worked down through the whole Queens team. Flanagan was forced behind the goal. However by an exceptionally spectacular bit of work, the McGill centre man skated out in front and completely fooled the goalie. Flin worked good combination with Dempsey, the brilliant wing tallying the last goal of the Intercollegiate season.

Final score: McGill 9; Queens 5.

The line-up was as follows:

| McGill | Queens |
|------------|-----------|
| Goal | McNeil |
| Defence | McNeil |
| Dempsey | Smith |
| McGerrigle | Ratchford |
| Centre | |
| Anderson | Nelson |
| Wing | |
| Flanagan | Temple |
| Dineen | Gibson |
| Subs | |
| Ross | McKelvey |
| Lynch | oBucher |

Scoring: First period.
Anderson — McGill
Anderson — McGill
Lynch — McGill
Flanagan — McGill
Flanagan — McGill.
Gibson — Queens
Second period.
Nelson — Queens.
Campbell — Queens.
Gibson — Queens.
Third period.
McKelvey — Queens.
Dempsey — McGill.
Flanagan — McGill.
Anderson — McGill.
Flanagan — McGill.

with laughs as readily as they produce them with heart throbs.

A man never tires about talking about his girl, and as seriousness is the keynote of comedy, the girl question frequently forms the basis of much theatrical fun. It is the basis of the comedy conception with songs, called "His Girl" which George Bobbe and Eddie Nelson offer. They are two chaps with bright and breezy personalities and a happy knack of putting their songs and stories over.

Raymond Wylie, well known to the vaudeville stage and one of the best known singles of the two-a-day and Marie Hartman, late of Gardner & Hartman, will be seen in an up-to-the-minute offering, entitled, "Before and After."

"Sandy," the little Scotch Immigrant, who sang his way into the United States after being detained at Ellis Island, when Gus Edwards took him in charge after posting a guarantee that he would not become a public charge and developing his natural abilities, proved one of the vaudeville finds of the season, will be heard in Scottish Folk Songs.

Herbert and Darc, undoubtedly the best gymnasts in vaudeville, will present a sensational offering of gymnastic feats and Teshow' Cats (the most remarkable and wonderful collection of tabbies ever brought together will offer an exhibition of feline intelligence.

ORPHEUM.

A strong double bill is offered at the Orpheum next week for their mid-winter carnival of comedy. The programme will be the three-act comedy, "Three Live Ghosts," and the sketch "Extravagance."

"Three Live Ghosts" has been well described as the enduring laughing sensation of the day, and all will read with pleasure that Manager Moss has secured it for the Orpheum Players. New York was highly amused, when it ran all last season at the Nora Bayes Theatre. The laughing situations are brought into the play by the adventures of a shell-shocked English soldier who, without even remembering his own name, smiles beamingly on all the world. "Spooky" has acquired the irresistible impulses of a kleptomaniac and gives away all that he steals. Then he is hit on the head by a policeman, recovers his memory and is very unhappy over the realization of what he has done, until he finds that he has stolen his wife's jewels and kidnapped his own child.

The experiences of his two comrades, also soldiers who had escaped with him from a German prison after they had been officially reported dead, are equally laughable.

Miss Phillis Gilmore played in the sketch "Extravagance," on the Keith Circuit in vaudeville, most successfully for two years, before she returned to the regular stage. She is assisted by the Orpheum Players, and the little play is said to be one of the most delightful entertainments.

OUR IMMORAL YOUTH

No one who keeps an eye on the doings and sayings of "this giddy globe" as reported in the columns of the daily press can have failed to notice the increasing flutter and agitation caused by the extravagant, immoral ways of the younger generation. Educators, reformers, and social service workers join battle on both sides. One day it is the automobile, the next it is lack of religion, and recently the opinion has been voiced that the girl "vamp" is to blame. While every so often the country is assured that its youth is at heart wholesome, and needs only to be directed gently into the straight and narrow path.

All this discussion is interesting—especially for those being discussed. One has something of the feeling of Mr. Cobb's goldfish when all his moral traits and characteristics are dragged triumphantly to the light. Sometimes, too, there is a temptation to wonder if the critics, in their zeal, are not piling Pelion upon Ossa, and driving their proud victims to further limits in order to uphold the reputation laid at their thresholds. For above all we of the younger generation are anxious to please—and if we are expected to be shocking, shall we not do our best to give satisfaction? But when everyone except the culprits themselves is allowed to make suggestions, this task is becoming increasingly difficult.

Are we really so much worse than our forefathers? Or was that philosopher wrong who said that every generation thinks its children lawless? Not that we object to all this talk, amusing as it is, but we should like to know whether the constant struggle to be horrible examples is unique with our age alone. If we have succeeded in stirring up the wrath of the just for the first time, we should at least get credit for that.

Second thoughts, however, dash these hopes for fame. One has but to remember the song "A Hot Time in the Old Town To-night" to see that we do not stand alone in our wickedness. And there is not a moral of some sort attached to the expensive, rakish horses and turnout of Pendennis?

Irate Mother—What do you mean, sir, by kissing my daughter last night? The Lad—That's what I've been trying to figure out since I saw her this morning.

Don't waste any more opportunities. Take her to the Medical Dance.

BASKETBALL TEAM AT QUEENS TEAM

Prospects Bright For Inter-Coll. Title.

The Seniors Basketball squad will battle at Kingston this afternoon with the Queens quintette for intercollegiate honours. The team left last night at 7.30 and everyone is on his toes to help clinch the title. Coach Fox, who accompanied the team, is confident that McGill will give a more decisive victory than they did at their last match with Queens here.

A great deal depends on this game, for, should McGill win, it means the intercollegiate championship, and on the other hand, if they lose, there will be a three cornered tie between Queens, Varsity and McGill. This being the case, an intense interest is being shown in the outcome of the game and it is hoped that the McGill lads will be more blessed by fortune than were the R. V. C. hockey team in Toronto yesterday.

Hasland, the Queen's forward, seems to be the most formidable opponent but Coach Fox has been giving Manson, Laishley and Mendelsohn plenty of shooting practice and they show much better form than in any of the previous games. The team as a whole seems to be in better condition to stand the pace of a swift game and it is hoped that this general all round improvement will overcome the disadvantage of playing on a strange floor.

The McGill line-up is as follows:—
Forwards—Laishley and Mendelsohn.
Centre—Manson.
Guards—Crain and Lixshin.
Spares—Lyle, Turpell and Amaron.

Fresh—"Ed, did you ever hear a rabbit bark?"
Ed—"Rabbits don't bark, silly."
Fresh—"That's funny, this book says that rabbits eat cabbage and bark."

She is hoping that you will call up and invite her to the Medical Dance. Will you?

Many a man has met his fate in a dreamy moonlight waltz at the Medical Dance. Who's next?

EDUCATED WOMEN FAIL IN EXAMS SAYS PROF.

Professor Gordon (Professor of Literature at Leeds University,) in an opening address before the Leeds Ladies' Educational Association, recently stated that in the matter of advanced education for women no man could remain unmoved by the audacity and courage shown by the pioneering of women of the last generation. He regretted the more the entire absence of this spirit of audacity and originality in the university work of women students of to-day, and what was still more important, in their work after leaving the university. They did good service in school teaching and so on, but, unlike their male contemporaries, they appeared to do no original or creative work and added nothing to knowledge. This was not true of literary students only; in philosophy, for example, mathematics, chemistry—to name a few of the cardinal studies of a university—it was the same story: a degree taken, often a distinguished degree, and after that a full stop. If they produced any work the chances were a thousand to one that it would be purely imitative and reproductive. And yet we knew that women had capacities of insight and interpretation peculiar to themselves and denied to men. What was happening to their capacities? There was no sign of them in the work of academic women. Were they, then, pursuing wrong ends, or were they pursuing them in a wrong way? Or was it premature to ask these questions? In his opinion it was not premature, the whole matter demanded examination.

The elder women who secured for their juniors the university privileges which they now enjoyed seemed to consider that they had finished their task. On the contrary their task had only begun. The higher education which they secured for women was a male education, patiently evolved by men for men through many centuries. This they had simply taken over, for it was a startling fact that to the subject of university education women had contributed, so far as he knew, not a single item. Acceptance and imitation had been their only motto. He would like to see a women's university or university college additional to those which men and women shared, where experiments could be made on women's education, and possibly new principles arrived at for the better employment of their capacities.

All education would benefit by such experiments, and not least the existing universities where men and women work side by side.

Miss Gwyer, an Oxford graduate and a warden of the Leeds University Hall, stated that from her experience as a university woman, gathered from several universities, she felt obliged to confirm Professor Gordon's general view. She pointed out, however, that the way of the woman graduate was not smoothed by fellowship; and that home duties engulfed many original minds.

RED COLLEGIANS

Without a particle of doubt the spread of the Revolutionary influence during the past few months has been very great, so great, as a matter of fact, that a red, literally speaking, publication has made its appearance in the country to the south of our own domain.

While this is in no way official publication of the local Revolutionary party, its contents are very interesting to many of the local students and the subject matter, as a whole is very elevating, although at times being of a slightly radical nature. The following is a typical sample of the nature of the material contained in this unique publication which is called "The Bolshevik Simulsky." The extract contains, without doubt, suggestions that will prove highly interesting to local athletes of both sexes.

Before one of the largest crowds to witness a galloping domino game in the University gymnasium the Faculty Black and Blue dice throwers downed the strong and hard-playing team representing the Vermonters' Club. The Pure White supporters were out strong and showed lots of pep, appearing in the gym in white middie, blue bloomers and unbuckled overshoes, creating much noise during the game by striking them together.

While the game was interesting, it was not close as many had expected. At the outset the visitors jumped into the lead but were able to hold it for only a short time before the longer experience and more accurate shooting of the Black and Blue Faculty team gave it the advantage.

The final score was \$49. "Dean" Workings starred for the Black and Blue, as he is in practically every game, securing half of the faculty's sevens. Lilly White was the highest point gainer for the visiting team, having four consecutive sevens to her credit.

The summary:—

| Faculty | Craps | Net |
|------------------|-------|--------|
| Workings | 9 | \$.75 |
| Rapid | 3 | .40 |
| Cannings | 4 | .13 |
| Mountains | 2 | .21 |
| Vermonters' Club | 18 | \$1.49 |
| White | 4 | \$.55 |
| Metcalfe | 3 | .35 |
| Flapper | 1 | .04 |
| Grind | 1 | .06 |
| | 9 | \$1.06 |

Referee:—Tully. Umpire: Edson.
Bone Specialist, Jaxson. Scorers: Hardnut and Squirrel. Time, 2.15 flat.

"Well, I'll swan," said the diving girl as she took off from the spring-board.

"That goes against my grain," said the farmer as he boarded up his bin.

MEDICINE '26 WIN SEMI-FINAL GAME

In a semi-final game played last evening between Medicine '26 and Science '23 the doctors finally managed, by the score of 12-5 to win after one of the most exciting and fast games played this year. Tight fielding and good pitching kept the few spectators on edge till the last man was put out.

The umpiring was very strict and some close decisions were made especially on the batters and were received in a very sportsmanlike manner by both teams.

Phillips the sterling pitcher on the McGill White team in the City League was on the mound for Medicine '26 and pitched in his usual brilliant manner. With the catcher Peacock they form one of the strongest batteries in the Inter-class league.

Grassick and Dredger gave a fine exhibition in fielding and together with Phillpotts, Gomeroy and Casselman scored most of the runs by heavy hitting.

Jimmie Simpson worked hard for the losers and pitched a good brand of ball. His fast twisters over the corners of the plate fooled the opposing batters time and again. His catcher Moran despite an injured hand caught to perfection and made a pretty put out at the plate which saved a likely looking run. Timmins, Stearns and Jackson played errorless ball in the field and the latter on first base caught everything within reach.

MacCracken with his famous smile was there with the goods and poled out his usual number of safe hits.

MacNutt, Johnson and Smallhorn collected the heavy hits and had Phillpotts working overtime. Their timely wallpops helped to make the game the most exciting seen for some time.

The team lined-up as follows:—

| Med. '26 | Sci. '26 |
|--------------------|-------------------|
| C. | |
| Peacock | Moran |
| P. | |
| Phillpotts | Simpson |
| 1st. | |
| Grassick | Jackson |
| 2nd. | |
| Puddicombe (Capt.) | Smallhorn (Capt.) |
| 3rd. | |
| Dredger | Johnson |
| S. S. | |
| Gomeroy | MacCracken |
| L. F. | |
| Casselman | Timmins |
| C. F. | |
| Garcin | Stearns |
| R. F. | |
| | MacNutt |
| Sub. | |
| | Chisholm |

Umpires: MacCullough and Henry.

Score by Innings:—
Med. '26 0 1 0 3 3 2 3 —12
Sci. '23 1 0 2 1 0 1 0 —5

AT THE THEATRES

ALLEN

What is admitted by many to be the most thrilling story of the turf ever screened is announced for presentation by the Allen theatre management all next week, commencing tomorrow afternoon. It is entitled "Thunderclap," and the picture takes its title from the name of the horse whose wonderful racing is a feature of the story. The tale deals with the experiences of a young girl, who returning home fresh from a convent education, finds her step-father in charge of a fashionable gambling house. A charming love story is interwoven, and the girl's devotion to an invalid mother, beautifully portrayed by Mary Carr, with astonishing realism, is one of the fine features of the play. There is of course a thrilling horse race, which, incidentally, is also an important event in the girl's life, and which, in the excitement and thrills, is in itself sufficient to hold the audience.

There are many other thrilling moments, one of them in particular when the hero goes whirling down rapids and is saved when on the very brink of destruction. In the filming of this incident Paul Willis, who plays the hero, nearly lost his life. He needed no histrionic skill to register fear. It was genuine.

As the story closes clean sportsmanship triumphs over crooked gambling, and the mother, her girl, and the boy all win happiness. Mrs. Carr's role is one of extraordinary difficulty, for she plays the part of the woman who is paralysed deprived of the use of her limbs, her body, and her speech. Yet she contrives to convey her thoughts solely by facial expression in a most realistic and convincing manner.

Philip Pelz, the Russian conductor, will again be seen wielding the baton this time conducting "Pere de la Victoire (Marche Militaire) and the Waldeufel Waltz". M. Pelz will in addition contri-

PRINCESS.

Gus Edwards, songwriter and producer, who is known lyrically and musically will furnish the headline feature of the bill at the Princess Theatre next week, commencing Sunday matinee. He will present his Fifteenth Annual Song Revue, with himself as its principal feature and introducing his "Fresh Crop" of newly found proteges, with Alice and Hazel Furness and Chester Frederick and the usual bunch of typical Edwards' peaches. The new production is characteristic of the kind he has always produced, with new songs, elaborate scenic settings and costume creations. It is sparkling with catchy songs, smart dances and clean comedy, full of action from start to finish and is one of vaudeville's real musical gems.

Claude and Fannie Usher have been favorites of vaudeville for several seasons and have given the devotees of this form of entertainment several little playlets of real heart interest and distinctive merit. They will be seen in their latest offering, "The Bide-A-Wee Home" in which these clever players have never appeared to better advantage than in this vehicle. The story of the sketch is not ordinary and never fails to please an audience, for the Ushers chase the tears

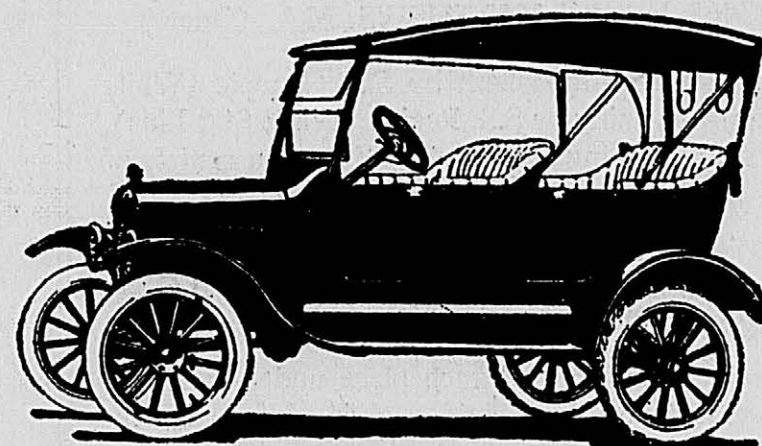

R.V.C. MEETS DEFEAT.

A special wire received by the "Daily" last evening stated that Toronto won the hockey fixture with the R. V. C. by the score of four to nothing. The game is said to have been splendid, great interest being manifested by the crowd present. The wire further declared "spectacular work by Kerr, goalkeeper."

NOTICES

LOST.

Lost McGill watch job at Park Slide Friday afternoon. Finder please leave with Union Porter and sincerely obligate.

MEDICAL DANCE COMMITTEE.

The medical dance committee will meet in the new medical building at 12 o'clock in lecture room.

MEDICAL DANCE TICKETS.

The sale of tickets for the Medical Dance to be held in the new Medical building on March 3rd, will be continued until noon today. All medals desiring tickets will please see class representatives at once.

The price is Five Dollars per couple.

SCIENCE HOCKEY.

There will be a game with MacDonald College this afternoon at St. Annes. The following are requested to turn out: Fairbanks, Russell, Johnson, Williamson, McKindsey, Rutherford, Crepeau, McLaren, Moore, Davies.

The team will leave on the 1.30 P. M. train from Windsor Station.

A. R. McLaren.

PROFESSOR EWING'S ADDRESS.

Professor Ewing, head of the department of Pathology, Cornell University, will deliver an address to undergraduates and graduates in Medicine at the new medical building at 9 o'clock this evening. The subject of this address will be "The Importance of Pathological Anatomy," and McGill medical students are especially invited to be present.

WICKSTEED GYMNASIUM COMPETITION.

The Annual Wicksteed contest takes place at Molson Hall Gymnasium at 2.30 P. M., Saturday March 4th.

Dr. F. W. Harvey, Dr. A. S. Lamb and Mr. C. B. O'Brien have consented to act as judges and are very capable so that the competitors will have an impartial verdict on their work.

The practices held at High School Gymnasium on Tuesday, Wednesday and Friday at 6 to 7 P. M. are well attended and a record number is expected to participate in the contest this year, amongst whom are the following:—

Paul Scott, C. A. Holland, G. D. McTaggart, J. H. Ross, L. H. Armstrong, J. R. Delahaye, F. Consiglio, J. R. McLeitch, C. P. Garein, P. R. P. R. Rolleston, H. B. Tatley, T. Fisher, A. S. Ross, S. G. Baxter, Don Stewart, E. S. Dunne, A. H. Bourne, J. Katz.

Any others desirous of competing will be welcome at practices.

The Drill and Dance are being demonstrated at each practice and every assistance given to any who require it.

R. V. C. 23

There will be a meeting of R. V. C. 23 in Room 12, R.V.C. at 1 P.M., Monday Feb. 27. All Juniors are urgently asked to attend.

R. V. C. THE DANCANT.

What are you doing next Saturday afternoon?—Come to the The Dancant at the R. V. C.—The Last—but not least of the season.

If this isn't sufficient inducement Mr. Adney and "Chub" Le Baron will play and the floor and tea will be up to their usual standard. Tickets—75c can be obtained at the Union and from the R. V. C. Students.

LOST.

On University or Aylmer Sts. Key Ring with 5 keys attached, if found, please leave with Porter, Union.

BASKETBALL.

Junior "C" play W. A. A. A. there on Tuesday, February 28th. Calvary Church, there at 8.00 on March 3rd.

There will be no further practice but every member of the team should be present at both games and finish the season strong.

Intermediate "A" play their last game at the Highlanders Armory to-day Saturday, Feb. 25th at 4.00 P. M.

If any of the following men cannot be present please notify the Captain so that he can secure one of the Junior players: James, Scharfe, Schwartzman, Browne, Blumenstein and Hilton.

volBjw uulaha 7o eM shr emi wwp

LOST.

Black leather lose-leaf note book at Montreal General Hosp. on the 23rd. Finder please communicate at Plateau 5036— or leave with Crawford at New Med. Bldg.

ENGLISH RUGBY.

There will be a meeting of the English Rugby Club at the Union on Monday, February 27th, at 5.30 p.m. The formation of an Intercollegiate League will be discussed. It is important that all members should be present.

ARTS JUNIORS.

All Juniors, who have not paid their advance fifty cent payment for the Annual, are requested to do so immediately: B.A.; M.D. to McLeod; B. Sci. men to Bishop; B.A., men to Read.

M. H. S. 18.

A reunion of the graduating class of 1918 of the Montreal High School will be held in the Recreation Room, Monday, Feb. 27th at 8.00 o'clock. All erst-while members of the class are asked to attend. Some may have been missed by the circular letter and if so, these are especially invited in this way. An attractive programme has been prepared and refreshments will be served.

ALMA MATER DANCE.

Tickets for the Alma Mater dance will be on sale at the Union at 1 P.M. today. Price \$5.00.

R. V. C. THE DANCANT.

The last R. V. C. The Dancant of the season will be held on March the fourth, in aid of the Student Christian Association.

ARCHAEOLOGICAL SOCIETY

Dr. Josef Strzygowski, professor of the History of Art, University of Vienna, will lecture to the Archaeological Society of Montreal on March 2nd at 8.30 p.m. in the Chemistry Building. Members of the staff and students are invited to hear this very distinguished Polish professor, whose subject will be "Iranian Landscape and Northern Art."

NEWFOUNDLANDERS.

The Annual Dinner of the Nfld Club will be held in the Union on March 9th. Details will be announced later.

There will be a lecture under the auspices of the Alpha Omega Alpha. Honorary Medical Society, in the new Med. Building at eight forty-five p.m. on Saturday, February twenty-fourth. The lecturer will be professor J. Ewing professor of Pathology at Cornell University, and his subject will be "The Importance of Pathological Anatomy."

C. O. T. C. PHOTO.

The proofs of the picture taken at Notman's Monday evening may be seen in Orderly Room, Arts Building from 5-6 p.m. any day this week. Men wishing to get pictures will sign their names on the back of the proof they desire. The proof with most signatures will be ordered for all who sign.

NEW VERSE TO JAMES MCGILL

To Mr. J. B. Parham, Sci. '08, goes the credit of composing an additional verse to that well known song "James McGill". Mr. Parham is a member of the McGill Graduates Society of Vancouver, and choose as the subject of the verse Principal Sir Arthur Currie. As many of the students do not know any more than the chorus of the first verse, the entire song is published here. The last verse is the new one.

"JAMES MCGILL"
Air: "Tammany".

At the college, by a roadway, on a little hill,
Stands a little greystone tombstone, over James McGill.
There beneath it, quietly sleeps, from care and sorrow free,
Our Father, whose bequest has made this University.
James McGill! James McGill!!
Peacefully he slumbers there, blissfully though we're on a tear,
James McGill! James McGill!
He's our Father, well yes rather! James McGill.

William C. McDonald was a follower of James,
He supplied the dough that keeps us, fresh for every game.
In our college history, their names together run,
If Jimmie is the father, why then Will's the eldest son.
William C! William C!
He did make our college run, giving William P. the mon'.
William C! William C!

Next to James and William C. we'll have Sir Arthur shine.
He's the boy who helped to fix the Watch upon the Rhine!
In his work at Old McGill, we'll find him straight and true.
And should he call upon us, why—you bet we'll see him through.

Arthur C! Arthur!
He's the boy who can and will, he cleaned up on Kaiser Bill,
Arthur C! Arthur!
Go it Caesar, you're the geezer, Arthur C!

ANNUAL RELAY CARNIVAL AT UNIV. OF PENN.

Great Athletic Competition Planned for Next Spring

MANY COLLEGES

Meet Will Be Composed of International Colleges

Pennsylvania's Twenty-eight Annual Relay Carnival, which will be held on Franklin Field on Friday, April 28, and Saturday, April 29, will bring together the most wonderful list of colleges and schools that have ever attended any athletic meet in the history of college sport. In 1914, Oxford University of England sent over a four mile relay team which defeated Pennsylvania by a scant six inches; none of the most remarkable races ever seen. Again in 1920 England sent over a combined team from Oxford and Cambridge which made a new world's record for the two mile relay race. Last year the University of Paris was represented and though the French collegians did not

GYM CLUB.

Special practices will be held at Molson Hall in preparation for Wicksteed Gym Competition on the following periods.

Feb. 27th Monday, at 5—6.30.
Mar. 1 Wednesday, at 5—6.30.
Mar. 2 Thursday, at 5—6.30.
Mar. 3 Friday, at 5—6.30.
Any new men desirous of turning out will be welcomed.

NOMINATIONS.

Students are reminded that nominations for the various offices of the Students' Council must be handed in to the secretary of the Council by 6 p.m. to-day. Each nomination must be signed by twenty five students.

The following are the offices to be filled:

President Students' Council.
President Athletic Association.
President Union.
Vice-President Union.
Secretary Union.
President Rugby Club.
President Hockey Club.
President Track Club.

The election of these officers will take place on Wednesday, March 8, and on Wednesday, March 15, the semi-annual meeting of the Students' Society will take place, where the new president and other officers enumerated above will be formally introduced to the student body, and the usual business transacted.

BASKETBALL.

The Intermediate "A" Basketball Team will play the Highlanders, on Saturday at 4.00 o'clock at the Highlanders Armory.

STUDENTS' SOCIETY.

A special meeting of the Students' Society will be held in the Union on Tuesday, Feb. 28th, at 5 o'clock. In order to expedite the business of the meeting notice of all questions to be asked should be in the hands of the Secretary of the Students' Council at least 48 hours prior to the meeting.

C. D. Fraser,
Secretary Students' Council.

A CRITICISM OF EXAMINATIONS

In abolishing midyear examinations the faculty of the Wharton School was influenced by a belief that this method of determining a student's fitness is no longer in harmony with modern educational principals. Such stress has so long been laid upon the examination that it has become an end rather than a means to an end. A student's attention is concentrated upon the passing of the examination and whatever knowledge he acquires is incidental to it. By doing away with the examination the faculty believed that the lost equilibrium would be restored. More emphasis would be laid upon daily work and the general level of study would be raised.

From the students point of view the examination is generally looked upon with disfavor because, in their opinion it is too seldom a true test of merit. In many instances, a student with a generally satisfactory knowledge of a course will fail an examination which deals with a specific subject not thoroughly covered by him. "Catch questions," employed, fortunately, by but a few departments, never fail to arouse the ire of those obliged to answer them. Even when an earnest effort is made to compare an examination fair both to student and professor the difficulties involved make success well nigh unachievable. It is this belief that the

win, their visit was most interesting. This year a team from the Universities of Italy will be here. The relay management is permitting the Italian universities to bring over a combined team which will meet the individual college teams of this country. The Italian teams should, therefore, be strong enough to furnish stiff competition for the American teams. The University of Havana has already sent word that they will be represented, while it is expected that two or three Canadian colleges will have men in the events. The Hamilton Collegiate Institute of Canada will bring down a team to compete for honours against the high schools of this country.

Though the invitations for the meeting have been out only a few days already seventy colleges have sent word that they will be on hand. These include all the big colleges of the East, with a sprinkling from the West, and a larger number from the South than usual. When all the college entries are in it is expected that even a larger number will send teams than did last year, when 112 colleges were represented. The school invitations are just going out but judging by the scores of inquiries already received, there will be close to 400 school teams at the Carnival. The real problem of the management is to arrange the events so that they may be run off in the two days given for the meeting.

The indoor season is just starting but already enough has been seen to indicate that very fine performances will be made in all the events. Two new relay college championships have been added to the programme, namely a quarter mile and a half mile relay, in which the runners will go 110 yards and 220 yards respectively. These races promise to be very popular and they should give a decided impetus to the development of sprinters in this country. It is expected that the final of these races will see all the fastest college sprinters in the final relays.

The championship events that are listed for the Carnival are as follows:

1. One-quarter mile college relay championship of America.

2. One-half mile college relay championship of America.

3. Two mile college relay championship of America.

4. Two mile college relay championship of America.

5. Four mile college relay championship of America.

6. One mile Freshman college relay championship of America.

7. One mile Class B college relay championship of America.

8. Sprint medley college relay championship of America.

9. Distance medley college relay championship of America.

10. One mile Preparatory School relay championship of America.

11. One mile High School relay championship of America.

12. Interscholastic medley relay championship of America. Open both to Prep. Schools and High Schools.

13. Two Mile Interscholastic Relay Championship of America. Open both to Prep. Schools and High Schools.

14. One mile Class B Preparatory School relay championship of America.

15. One mile Class B High School relay championship of America.

16. Middle Atlantic States Conference A. A. one mile relay championship.

17. South Atlantic Intercollegiate A. A. one mile relay championship.

18. College Pentathlon of America.

There will be the usual large number of relay races for colleges, preparatory schools, high schools, grammar and parochial schools, the latter two being limited to Philadelphia Schools. The twenty-five championships listed above would make a wonderful meet of themselves, but the groups relay races are in many cases local or divisional championships and are keenly contested for by the teams entered.

In addition to the above, the following special events open to all college athletes regularly enrolled are given: 100 yards dash, 120 yards high hurdles, 440 yards low hurdles, high jump, broad jump, pole vault, shot put, hammer throw, javelin, discus, hop step and jump and two mile international. These events are so high class that the Relay Management ask that colleges enter only their best men. Each year, new records are made in these events or the existing records closely approached. Wonderful performances are expected in all of these events as the best athletes of the country will be entered. The two mile international will probably see representatives from one or more European countries in the event. Team entries close on April 1, and managers of college and school teams are asked to send in their entries at once so that the very large number of banners, watches and medals may be entered or engraved in time.

Examination is not wholly fair that has brought increased pressure upon the honor system and it accounts for no small proportion of its violations. By abolishing midyear examinations two weeks were added to the time available for class instruction, an increase of approximately ten per cent. This time can be utilized either for a review more valuable than the eleventh hour examination "cram" or for the broader and deeper study of a course. It is true that in the trial of the new system this plan was not followed in all courses, but it must be remembered that the change was not instituted until the work for the year had been already mapped out.

Many of the annoying features of the new system are, but temporary difficulties of administration. It is to be expected, if the innovation is endorsed and made permanent, that difficulties arising from conflicting examinations and the like will be remedied. The question should be judged on the broader basis of principle rather than convenience. —The Pennsylvanian.

CARNIVAL IS WELL STAGED THIS YEAR

(Continued from Page One)

diebry: Hadlock, Dartmouth; Egerton, McGill.

The jumping entries are numerous. Besides the American students and McGill team, the Montreal Ski Club and Le Club de Ski Montreal are sending members despite the fact that there is an important ski meet at Ottawa. Findlay, the winner of the Montreal Ski Club's contest last winter, will be on hand, while for the French Canadiens Basse can be relied upon to put up a good showing. The afternoon jumping will commence sharp at 3.00 o'clock in order to allow for the exhibition which will follow. Much has been said of the noted Dartmouth somersaults, and little more is needed. Anyone who wants to see a daring stunt need only be present at the Cote des Neiges jumps to-day.

The weather has been all that could be expected. Thursday's snowfall and thaw have made skiing "fast." The ski and snowshoe dashes to take place on the campus this morning at 10.30 o'clock will therefore be under good conditions and more give use to keen contest, especially as the Red and White athletes will have to make good in all remaining events if they intend to follow this year's record.

It is with regret that Vermont did not send a team to Montreal. Owing to a lack of snow in their part of the country, they had no opportunity to practise. It is with sincere hope that the appearance is looked for next year the eastern Canadian meet at McGill.

McGill entries for to-day follow: Jumps: Whittall, Gravel, Leslie, Glen, H. Smith and Sherrard.
Ski Dash: D. Foss, Jane, Glen, Macklaier.
Ski Relay: Foss, Lane, Glen, Whittall.
Ski obstacle: Leslie.
Snowshoe Dash: Anderson, Berstein, Bishop Stone.
Snowshoe Obstacle: Anderson.
